

MIRROR

MIR 505

INSIDE APPLICATION

See without being seen

BRONZE ONE WAY MIRROR

For clear glazing and double glazing less than 1.20 m², the MIR 505 is the best solution to see from the inside, while offering a mirror effect from the outside. This way you keep transparency from your glass and still preserve your privacy.

INFORMATION

MATERIAL:Crystal pet
ADHESIVE:Acrylic polymer
LINER:Pet 23 microns
THICKNESS:80 microns
COLOR:Bronze
APPLICATION SIDE :Inside
THERMAL RESISTANCE:From -20 to 80°C
UVA TRANSMISSION:5%
APPLICATION T° :min, + 5°C
FIRE RATINGS:B-S1, D0
STANDARDS :EUROCLASSES
WARRANTY:10 years inside*

DIMENSIONS

1,52 x 2,5 m
 1,52 x 5 m
 1,52 x 10 m
 1,52 x 30 m

*for glazing not exposed to the sun

Durability : from 12 to 15 years for vertical application in central Europe.

Use : Réfectiv window films are designed for use on any type of clear normal glass.

Maintenance after 30 days : with usual cleaning solutions (non-abrasive, without ammonia...). Cleaning products that may scratch the film should be avoided.

Storage : 2 years from delivery. This film should be kept away from excessive humidity and sun rays, at temperatures below 38°C.

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice.

Application's instructions

Application's video

Application Method

The glass surface to be glued on has to be free from dust, grease or other contaminants. Some specific materials such as polycarbonate can cause air bubble problems. Therefore, a compatibility test is recommended. For more precision we recommend to refer back to the application table.

Production and standards

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice. Before applying our products we recommend that our users ensure that the film is suitable for the intended use and comply with current standards.
